Template Creation
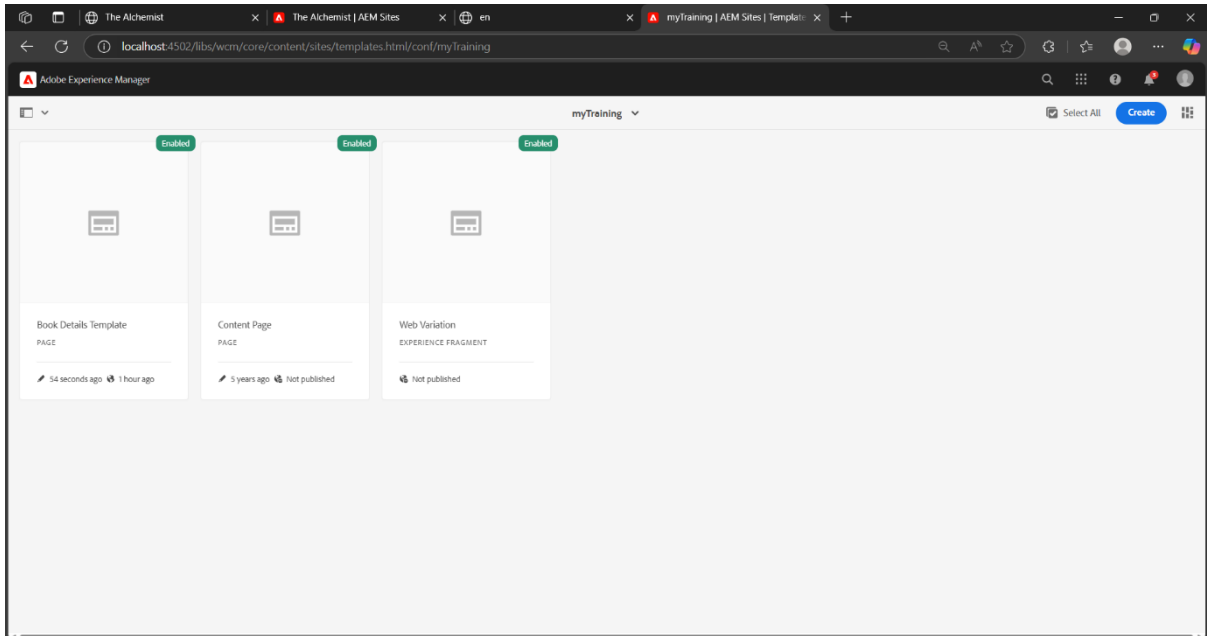

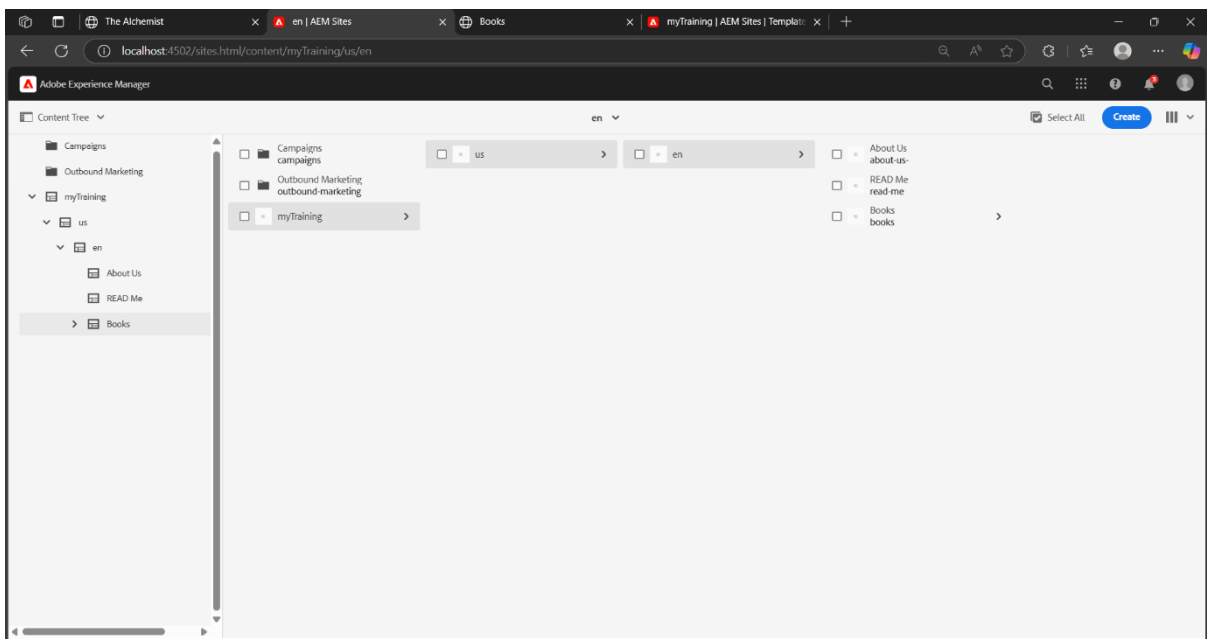

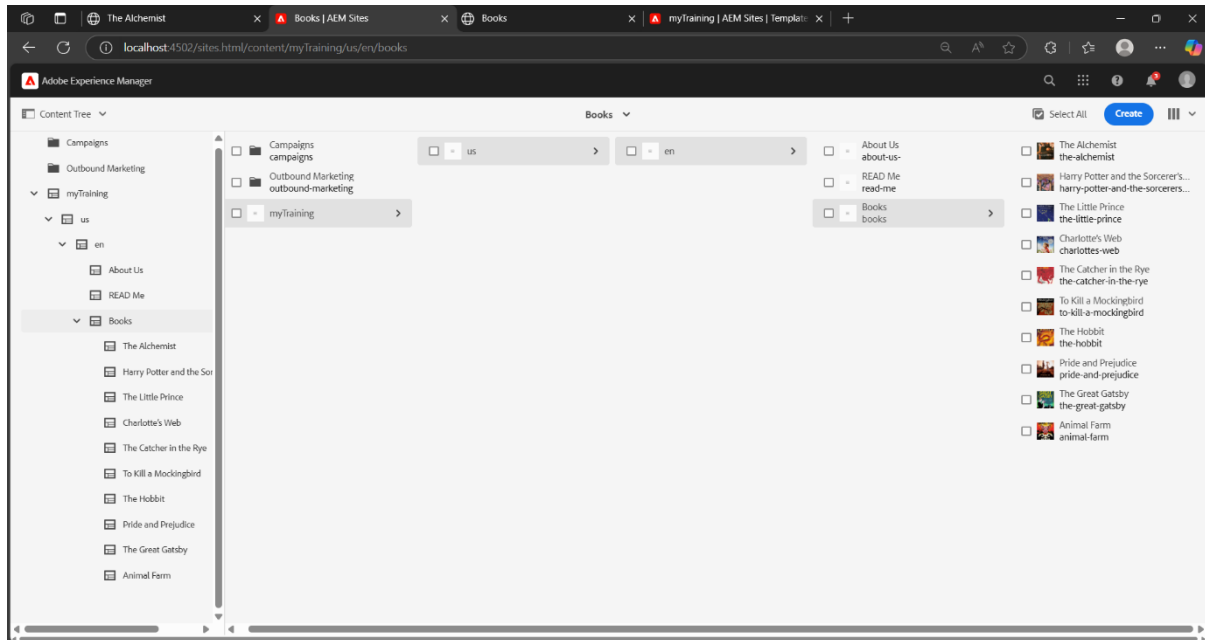

1.Create a new template and enable it

2. Create pages for **About Us**, **README**, and **Books** to provide information and details about the website and its offerings

3. Create 10 pages under the Books section to display detailed information about the availability of various books.

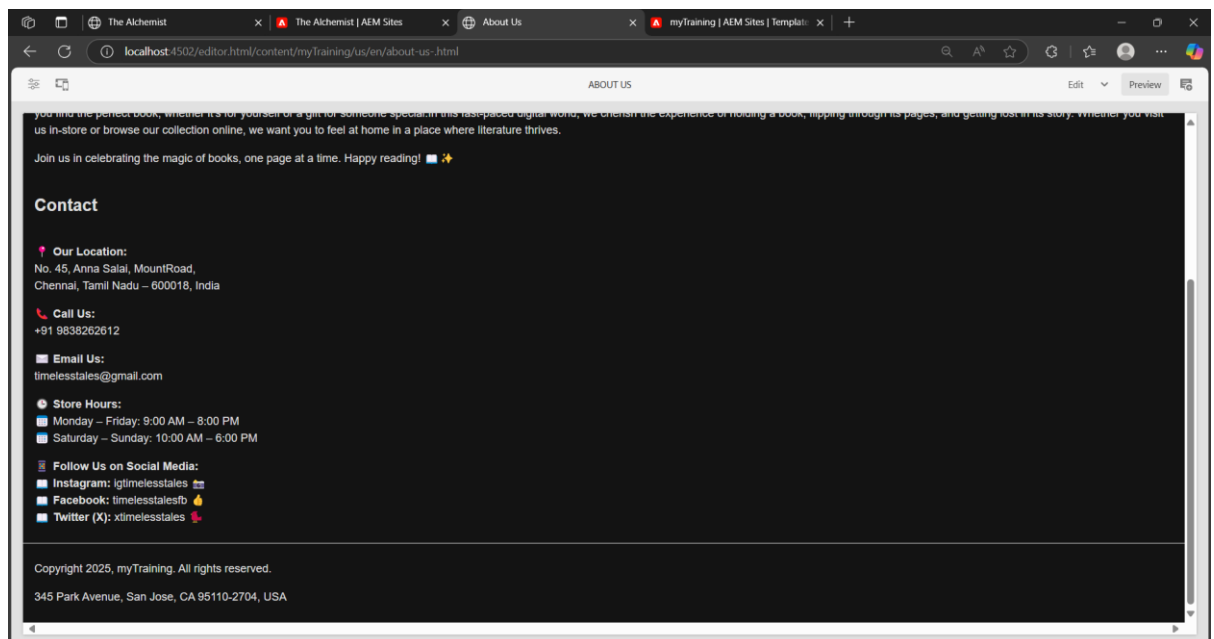

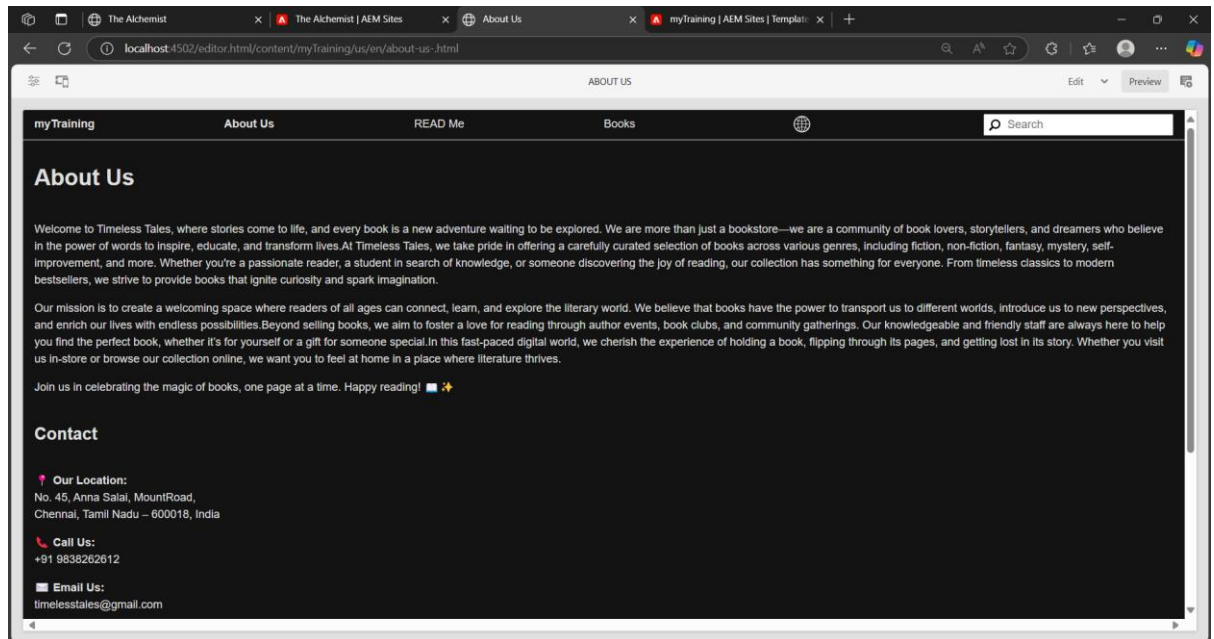

(Add images through the properties option by selecting the appropriate book)
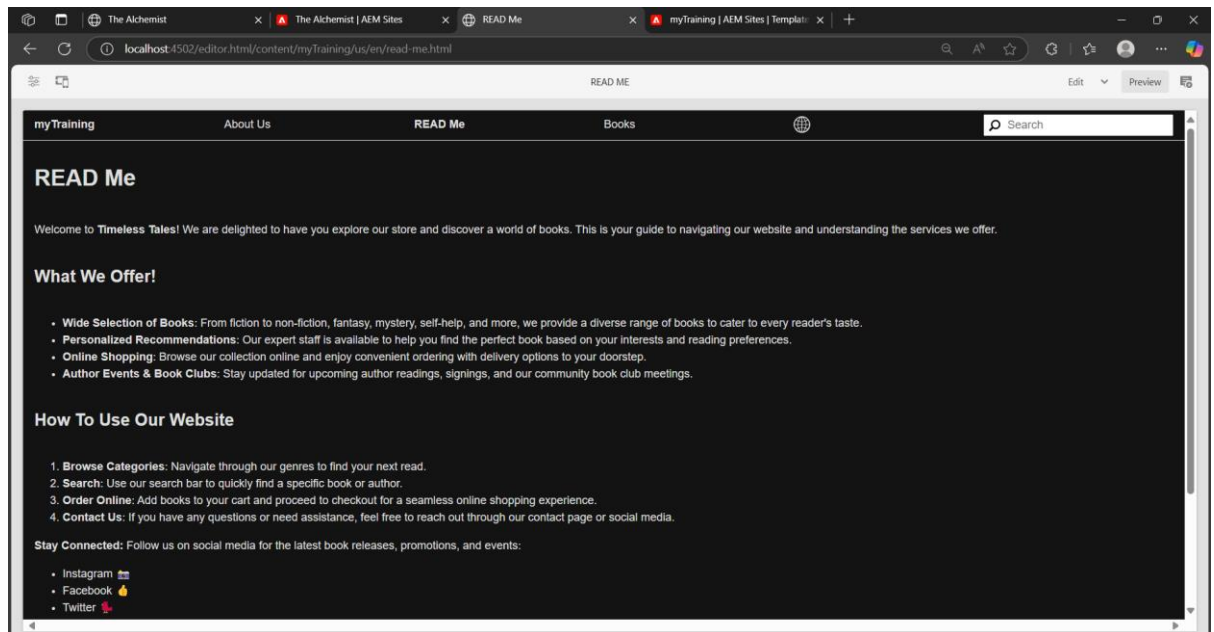

4. After providing the content for the required pages, now proceed to open each page on the site to display the content.
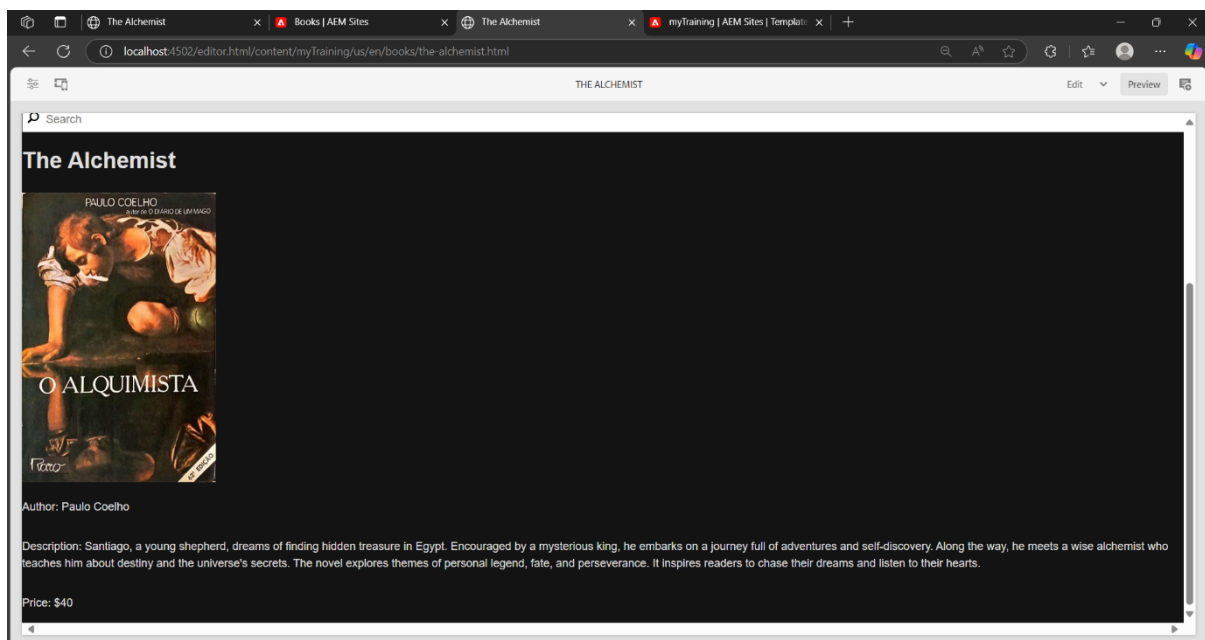

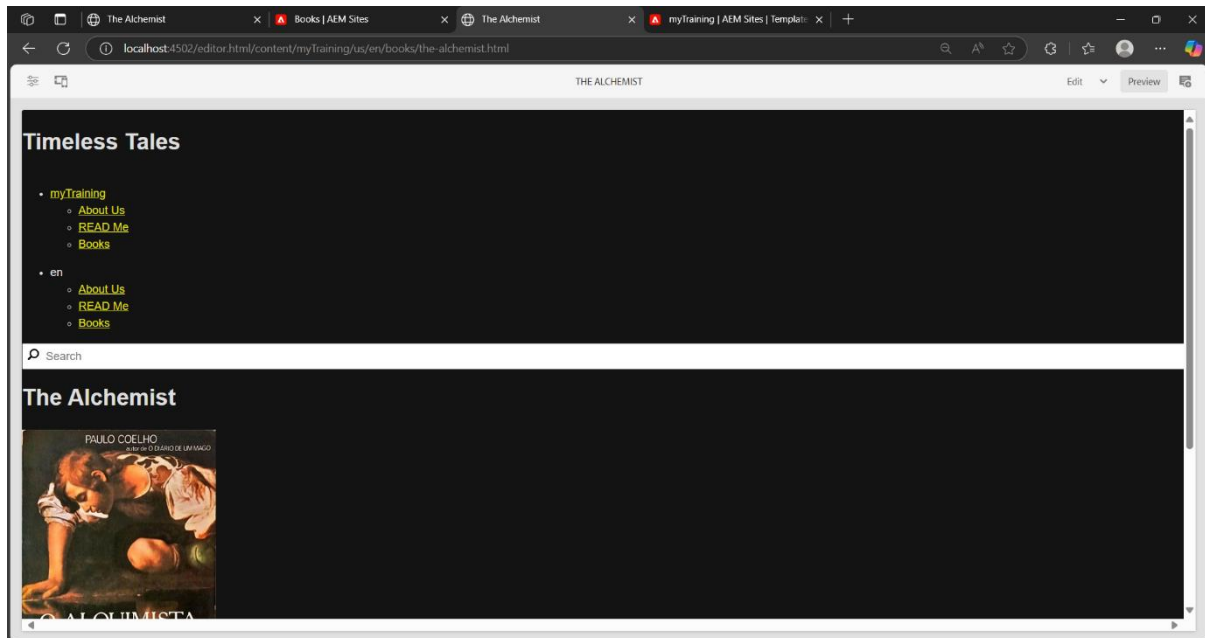

- About us :

- Read me :

- Books :

5. The details of the books will be displayed after clicking on the required book, showing information such as the book's description, author, price.
    i.   The Alchemist

(The search option can be used to easily find books by title, author, genre, or keywords, allowing users to quickly locate the book they are looking for.)

ii.   Harry Potter and the Sorcerer's Stone

iii.   The Little Prince

iv. Charlotte's Web
